

Authorship of Papers

We need to be sure that all authors of IJE papers meet the criteria of authorship agreed by the International Committee of Medical Journal Editors. We also want to be sure that there is no-one who meets such criteria who is not listed as an author.

The corresponding author should therefore read the criteria listed below and sign and return the form.

“Each author should have participated sufficiently in the work to take public responsibility for the content. Authorship credit should be based only on substantial contributions to a) conception and design, or analysis and interpretation of data; b) drafting the article or revising it critically for important intellectual content; c) final approval of the version to be published; d) agreement to be accountable for all aspects of the work in ensuring that questions relating to the accuracy or integrity of any part of the work are accurately resolved.

Conditions a), b), c) and d) must all be met. Participation solely in the acquisition of funding or the collection of data does not justify authorship. General supervision of the research group is not sufficient for authorship.”

MS number (if known):

Title:

All of the authors listed on this paper meet the criteria set down by the International Committee of Medical Journal Editors. No-one who might consider that he or she has a right to be an author has been excluded.

Name of corresponding author:
